## Improved Air Quality

Microbes can double every 20 minutes on an untreated surface!

Standard plastic pan with visible mold

Plastic pan with Microban® antimicrobial additive

Mold is part of our environment and there are no practical ways to completely eliminate mold spores. The best defense against mold in a home is to prevent it from taking hold through moisture control and the use of mold resistant building materials.

Every Healthy Solutions® coil features Microban® technology, providing added protection against the build-up of mold and mildew within your system!

## Lower Height

ADP provides space saving opportunities and a perfect fit with your furnace!
