3. PRODUCT DESCRIPTION

Basic Use: Ultra*Duct Black Duct Board is a rigid board designed for fabrication into supply and return air HVAC duct work. The product can be used in heating and cooling systems which operate at velocities up to 5,000 fpm (25.4 m/s), temperatures up to 250°F (121°C) and maximum internal pressures of ± 2" (51mm) water gauge.

Benefits: This product is strong, resistant to mold, bacteria and microbial growth, and easy to clean. In addition, Ultra*Duct Black provides excellent thermal properties, absorbs unwanted crosstalk, equipment and air rush noise and exhibits low air flow resistance. It also meets all applicable fire resistance standards and building code requirements. The product can be precision cut using both manual and automatic cutting equipment.

Composition and Materials: Composed of resin bonded glass fibers with a reinforced foil laminate air barrier/vapor retarder facing applied to the outside surface and a fiber glass textile mat bonded to the air stream surface.

The air stream surface contains an EPA registered anti-microbial agent in order to reduce the potential of microbial growth that may affect this product. The anti-microbial properties are intended to only protect this product.

Limitations: Ultra*Duct Black is not to be used under poured concrete slabs or to convey exhaust fumes, solids or corrosive gases. Ducts exposed to the weather must be weather protected and reinforced per industry standards. Ducts must not be used as vertical risers more than two stories in height. They must not be used adjacent to high-temperature heating coils. Insulation should be kept clean and dry during shipping, storage and system operation.

Sizes: Standard available sizes as noted in the table below. Contact CertainTeed for availability and minimum order quantities.
