

2013 + 2014 DESIGN GUIDE
CUSTOM SHOWER

DESIGNED FOR YOU. BY YOU.

Imagine a shower experience all your own. With the perfect mix of function and relaxation. And the exact right features in the exact right places. With Delta Faucet Company, it's easy to make your vision a reality. Whether you're building a new home or remodeling an existing bathroom, we have a breadth of options that, together, help bring your dream shower to life.

This guide walks you through the process of designing your ideal custom shower, step-by-step.

Step 1. Define your vision.

Step 2. Gather information.

Step 3. Select your valve.

Step 4. Choose your configuration.

Step 5. Select your shower components.

Every step is important so you can create your own personal shower experience. Dream. Create. Then relax and enjoy.

R1827 Jetted Shower™ Diverter Rough	79
R18000 Jetted Shower Rough	80

Step 1: Define your vision.

More than likely, you already have some image of the perfect shower in your mind—how it looks and feels. As you look to make your vision a reality, consider the following questions:

- Are you looking for relaxation at the end of a stressful day? Or an exhilarating experience to get your day going?
- Who will be using the shower? Only adults? Children?
- Would you like an enclosure? Or a combination of full and half walls?
- Are you looking for an easy update or a complete renovation?
- What is your budget?

Have you considered?

Different types of components deliver very different experiences—either alone or in concert:

- **Showerheads:** Experience sensations from falling rain to invigorating, full-body coverage.

- **Handshowers:** Put water where you need it to make tasks easier, from shaving legs or bathing children to washing the dog.

- **Body sprays:** Direct, massaging sprays placed on one or multiple walls envelop you with water.

Take any sketches or sample swatches you may have to the showroom with you. An associate will help you choose the right products to create your dream shower.

Step 1: Define your vision.

CHOOSE THE INNOVATIONS THAT ARE RIGHT FOR YOU.

H₂Okinetic® Shower.

Why settle for an ordinary shower, when you can have an extraordinary experience? Using proprietary technology, the larger droplets formed in an H₂Okinetic shower move in a unique wave pattern, helping them retain their heat better and creating a warmer shower experience that feels like more water, without using more water. You'll find H₂Okinetic Technology in many of the showers, handshowers, body sprays and jets featured throughout this guide.

More Coverage: H₂Okinetic® Showers provide 3X the coverage of a standard shower.

More Warmth: Larger water droplets and a dense shower spray pattern result in a warmer shower experience.

Note: Darker areas indicate greater heat.

More Intensity: The unique wave pattern and velocity of the water create the feeling of more pressure.

In2ition®— Two-in-One Shower.

When the In2ition Shower is in its primary position, it functions like a regular showerhead. When you need to rinse from close range, simply remove the handshower. It's two showers in one beautifully convenient package.

Palm® Shower.

For control and versatility in the palm of your hand, look no further than the Delta® Palm Shower. It offers simple, one-handed operation with a rubberized grip to hug your hand securely. So, whether you are showering yourself, a young child or a pet, you are in control.

ActivTouch® Handshower.

Imagine eight spray settings in one incredible handshower. That's exactly what you get with ActivTouch. Its ergonomic handle and buttons provide the ultimate in convenience and functionality. From a full body spray to a concentrated massage spray (and everything in between), it brings luxury to the shower.

Step 1: Define your vision.

WATER. YOUR WAY.

One shower experience does not fit all. That's why in addition to shower styles, we provide plenty of water spray patterns to suit different needs. So you always get the exact shower experience you're looking for.

Showerhead and handshower sprays.

Adjustable Full Body Spray (AF)
Adjust the water flow for a harder or softer spray.

Adjustable H2Okinetic® Spray (AH2O)
Allows for full flow or water-efficient spray.

Crossing Full Spray (CF)
Consistent pressure from all spray holes with crossing streams for more coverage.

Crossing Full Spray with Massage (CFM)
Coverage of crossing full spray with addition of a soothing, pulsating spray.

Full Body Spray (FB)
Consistent pressure from all spray holes.

Fast Massage (FM)
Strong, pulsating spray.

Full Spray with Massage (FSM)
Consistent pressure from outside spray holes, plus soothing, pulsating spray.

High-Efficiency Spray (HE)
Provides full coverage and feels like greater water pressure at lower flow rates.

H2Okinetic Spray (H2O)
Large drops and dense, wide spray pattern create a blanket of water.

H2Okinetic Spray with Massage (H2OM)
Large drops and dense spray pattern plus a pulsating spray.

Massage Spray (M)
Soothing, pulsating spray.

Pause
Reduces water flow to a trickle.

Soft Rain Spray (SRS)
Gentle fall of water that feels like a soft, spring rain.

Soft Drench Spray (SD)
Soft, aerated, soaking flow of water.

Soft Drench with Full Spray (SDF)
Soft, aerated, soaking flow of water with additional sprays to provide fuller coverage.

Soft Drench with Massage (SDM)
Drenching full spray plus a pulsating spray.

Soft Full Spray (SF)
Soft, consistent pressure from all spray holes.

Slow Massage (SM)
Soothing, pulsating spray.

Shampoo Rinsing Spray (SR)
Strong, full body spray.

Shampoo Rinsing with Massage (SRM)
Strong, full body spray plus a pulsating spray.

Step 2: Gather information.

Before you begin looking at style and finishes, there is some additional information that you'll need to pull together to ensure that your system performs perfectly.

Measurements.

Jot down the measurements of the floor, walls and ceiling of your bathroom. You will also want to measure your shower. This information will show anyone helping you exactly how much room you have to work with.

Water heater.

The hot water supply is critical in determining whether the system you've designed will be a success. Your water pressure should be at least 45 psi, plus you'll need to determine if you have 1/2" or 3/4" supply lines at your shower. Delta Custom Showers do not require 3/4" supply lines. For help in determining the demand of your system, use our Hot Water Demand Calculator (below). Ultimately, be sure to consult a licensed plumbing contractor—and/or the water heater manufacturer—to determine if the size and model of your water heater are appropriate.

Hot Water Demand Calculator			
Total Outlet Flow Calculation	Hot Water Multiplier	Time in Shower	Total Hot Water Demand
_____ gpm	_____ gpm × .7	× 5 Minutes	= _____ Gallons
_____ gpm	_____ gpm × .7	× 10 Minutes	= _____ Gallons
_____ gpm	_____ gpm × .7	× 15 Minutes	= _____ Gallons
_____ gpm	_____ gpm × .7	× 20 Minutes	= _____ Gallons

Note: This calculator reflects hot water consumption, and is NOT intended for use in the sizing of your water heater.

Drains.

It's crucial to plan for proper drainage. If you have an existing drain, measure it from edge to edge. Since a single valve system can flow up to 9 gpm, and a two valve system could flow up to 18 gpm, we recommend two 2" drains, or one 3" drain for your system. Again, you should consult with a licensed plumbing contractor who will be doing the installation, in order to get the proper guidance.

Step 3: Select your valve.

MultiChoice® Universal.

One rough. Unlimited possibilities. With either the pressure-balanced or thermostatic cartridge, you only need one rough from Delta®—the MultiChoice Universal. This single rough works with any Delta valve cartridge plus any Delta faucet trim package for unlimited style flexibility.

MultiChoice Universal High-Flow Rough.

For custom showers, the MultiChoice Universal high-flow rough handles the demands for increased water flow. When you're selecting your shower, you don't have to worry about the plumbing behind the wall. One rough does it all.

Understanding Delta Valve Cartridges.

Delta offers two types of valve cartridges for our semi-custom Jetted Shower XO®—pressure-balanced and thermostatic. Our Custom Shower systems use only thermostatic valve cartridges. To follow is more information about these options.

Dual-Function Thermostatic Valve Cartridge.

- Measures and monitors the temperature of the water and automatically adjusts the water mix to maintain a more precise water temperature
- Maintains constant temperature during a shower (+/-3.6° F)

Dual-Function Pressure-Balanced Valve Cartridge.

- Balances the pressure of both hot and cold water for temperature control
- Maintains constant temperature during a shower (+/-3.6° F)

Finish Abbreviations

The following codes are added to the end of each product number, indicating the finishes that are available for that product.

No suffix = Chrome
 CZ = Champagne Bronze™
 PN = Polished Nickel
 RB = Venetian Bronze®
 SS = Brilliance® Stainless
 WH = White
 WC = White/Chrome

Step 4: Choose your configuration.

Which shower is the one for you?

It's time to create *your* shower. We know it can be confusing, so we've included a chart (page 6) to help you decide which components can create the experience you deserve.

Option 1: Jetted Shower XO® Semi-Custom System.

Introducing the only semi-custom showers in the industry: Delta's Jetted Showers. If you're revamping an existing bath or want an enhanced shower experience on a lean budget, then a Jetted Shower XO may be perfect for you.

- Features showerhead and two spray jets with a wide, revitalizing, yet relaxing spray.
- Add functionality by selecting an additional showerhead, In2ition® Shower, XO Jet Module™ or handshower as your eXtra Outlet.

- Standard 1/2" piping uses the existing drain or water heater—eliminating the need for extensive plumbing upgrades.

**To create a Semi-Custom Jetted Shower XO, begin on page 14.*

Option 2: TempAssure® Thermostatic Custom Shower System.

If you're looking to transform your bath with a rejuvenating, spa-like shower that is completely customized to your preferences, then you want a Custom Shower.

- Select up to four body sprays in addition to a handshower, In2ition Shower or additional showerhead.
- Utilizes standard 1/2" piping.

**To create a Custom Shower system, turn to page 40.*

Things to consider.

Here are some thoughts to keep in mind as you develop your dream shower:

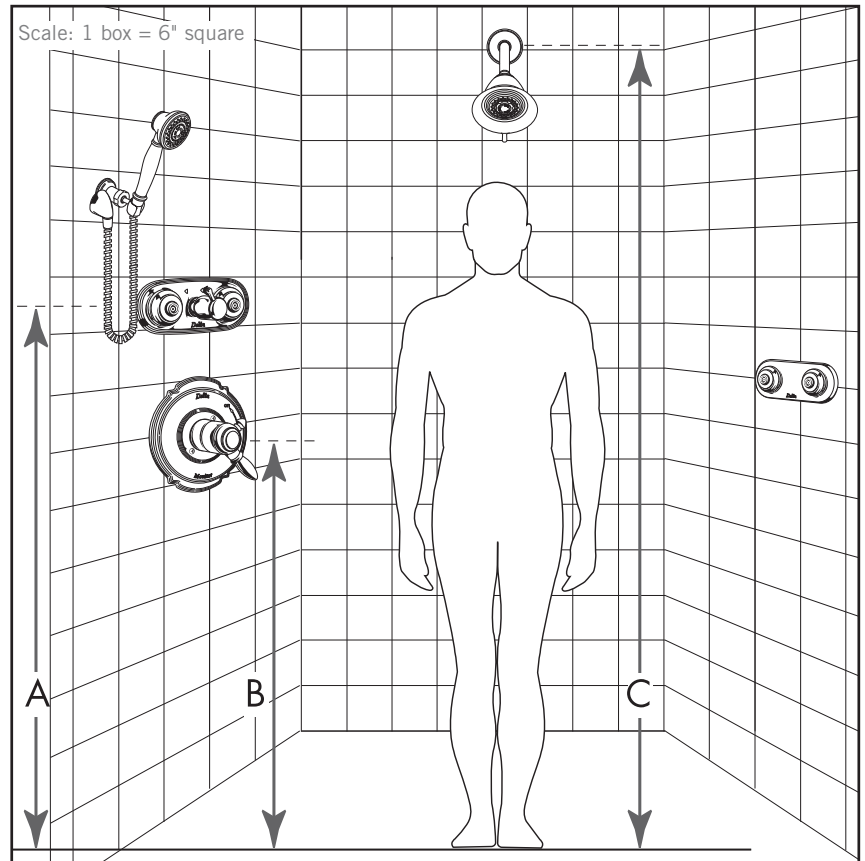

- The more outlets (showerheads, In2ition® Showers, body sprays or handshowers) you have in your shower, the greater the amount of water pulled through your valve. If you have too many, the spray may be softer with less pressure.
- Make certain you can stand under the showerhead and feel the body sprays hit you at the same time.
- Try to keep body sprays from aiming at the door. It will help prevent water from leaking out of the shower.
- For an optimal experience when creating a custom shower system that uses more than three outlets, the active outlets should not exceed the flow rate of the valve at the specified water pressure. A pressure booster may be required.
- If using a bench, you may want a body spray positioned to hit you in the lower back when sitting.
- To encompass your body with water, position body sprays on multiple shower walls.
- When using an overhead showerhead, do not position the drain immediately below the showerhead. Standing on the drain may flood the shower.
- Make sure the floor is sloped toward the drain, usually away from the shower doors.
- When installing Delta H₂Okinetic body sprays, make sure rough is installed prior to tiling.

Placement guide—Semi-Custom Jetted Shower XO.®

User height is one of the most important things to consider when designing your semi-custom Delta® Jetted Shower XO system. Remember that all users should be considered—including children or seated bathers.

- A. **Jetted sprays** should be easily accessible for all users, so consider the heights of all users when placing the jets.
- B. The **temperature control** should be placed about waist high, approximately 36" from the bottom of the shower enclosure. (For tub/shower systems, the temperature control will need to be placed 8"-18" directly above the tub spout.)
- C. The **showerhead** should be installed so that it is above the head of the tallest user, but still within the reach of the shortest user. Ideally, the tallest user should not have to crouch or duck under the showerhead to rinse his or her hair, while the shorter user should be able to manually adjust the spray modes of the showerhead.

System 1 Sample: Semi-Custom Jetted Shower XO with XO Jet Module™

How to: Select the Collection or components that best fit your style from pages 21–29. Insert your model numbers below to create your desired shower.

For more complete water coverage in the shower, this Jetted Shower XO system is perfect. Warm, dense spray patterns cover your body, leaving you invigorated and ready to start the day.

Diverter settings:

- 1st position Showerhead only
- 2nd position Showerhead and jets
- 3rd position Jets only
- 4th position Jets and XO Jet Module
- 5th position XO Jet Module
- 6th position Showerhead and XO Jet Module

The sample form below has been filled out using handwritten type to indicate choices that need to be made for this specific configuration.

Design your own Semi-Custom Jetted Shower XO worksheet.

How to create your perfect semi-custom shower:

1. Reference the shower configurations on pages 15–20 or develop your own.
2. Select the Collection or components that best fit your style from pages 21–29*.
3. Insert your model numbers below.

*To review information regarding pressure-balanced versus thermostatic valve cartridges, see page 10.

Placement guide—TempAssure® Thermostatic Custom Shower.

User height is one of the most important considerations when planning a Custom Shower. Remember that all users should be considered—including children or seated bathers. If there is a great difference in height between users you may want to include a separate volume control for the highest body spray so that it can be turned off without having to turn off all of the body sprays.

- A. The diverter control should be easily accessible for all users. Typically it is just above or below the shower valve, but it can be set just inside the shower door for easy access.
- B. The shower valve should be placed about waist high, which is approximately 36" from the floor of the shower.
- C. The lowest body spray is usually placed at knee or thigh height.
- D. The middle body spray is usually placed at hip or waist level.
- E. The highest body spray is usually placed at shoulder or back height.
- F. The showerhead should be installed so that it is above the head of the tallest user, but still within reach of the shortest user. Ideally, the tallest user should not have to crouch or duck under the showerhead to rinse his or her hair, while the shorter user should be able to manually adjust the spray modes of the showerhead.

Things to consider:

- If using a bench, you may want a body spray positioned to hit you in the lower back when sitting, or even below bench for leg massaging to increase circulation or relieve tension.
- To encompass your body with water, position body sprays on multiple shower walls.
- Aiming body sprays directly at the shower door may cause leaks.
- When using an overhead showerhead, do not position the drain immediately below the showerhead. Standing on the drain may flood the shower.
- Make sure the floor is sloped toward the drain, usually away from the shower doors.
- When creating a shower system that uses more than three outlets, Delta® recommends using a pressure booster if your pressure is less than 80 psi.
- For an optimal experience when creating a custom shower system that uses more than three outlets, the active outlets should not exceed the flow rate of the valve at the specified water pressure. A pressure booster may be required.

Customize to your heart's content.

When you decide to create a Custom Shower, there are many choices to make. You want to ensure everything is just the way you imagined. So, don't forget to consider different shower arms that can give your showerhead further reach or different decorative shower arm flanges.

System 3 Sample: TempAssure® Custom Shower with Body Sprays and Handshower. (3-wall installation; for single wall—place all body sprays on the valve wall)

How to: Select the Collection or components that best fit your style from pages 47–58. Insert your model numbers below to create your desired shower.

Four body sprays and a showerhead wrap your body in warm water from three sides, while the handshower lets you direct the water.

Diverter settings:

- 1st position Showerhead only
- 2nd position Showerhead and body sprays
- 3rd position Body sprays only
- 4th position Body sprays and handshower
- 5th position Handshower
- 6th position Showerhead and handshower

The sample form below has been filled out using handwritten type to indicate choices that need to be made for this specific configuration.

Note: For maximum experience, minimum of 80 psi or a pressure booster is recommended.

System 1 Worksheet: TempAssure® Custom Shower with Body Sprays. (3-wall installation; for single wall—place all body sprays on the valve wall)

How to: Select the Collection or components that best fit your style from pages 47–58. Insert your model numbers below to create your desired shower.

Note: Minimum of 45 psi is recommended.

Encapsulating you in warm, luxurious water, the four body sprays in this custom shower system revitalize and soothe. Change the wall mount showerhead to a ceiling mount model and you'll be standing in a rain shower of warm, dense, satisfying droplets.

Diverter settings:

- 1st position Showerhead only
- 2nd position Showerhead and 2 body sprays (left side)
- 3rd position 2 body sprays only (left side)
- 4th position 4 body sprays
- 5th position 2 body sprays only (right side)
- 6th position Showerhead and 2 body sprays (right side)

Note: For optimal experience, minimum of 80 psi or a pressure booster is recommended.

Step into an oasis every day. This system uses four body sprays and a showerhead to wrap your body in warm water from three sides, while the handshower lets you direct the water exactly where you want it. The diverter allows you to create the shower combination of your choosing, like soothing sprays with a drenching showerhead. You won't ever want this shower to end.

Diverter settings:

- 1st position Showerhead only
- 2nd position Showerhead and body sprays
- 3rd position Body sprays only
- 4th position Body sprays and handshower
- 5th position Handshower
- 6th position Showerhead and handshower

Installation and technical information

Product specifications.

Jetted Shower XO® Components (R18000-XO)

NOTE: R18000-XO or R18000-XOWS must be used for configurations using an eXtra Outlet

- 1/2" rough-in
- Installs during rough-in phase of project
- Allows for pressure testing of system
- Includes rough for one jet module diverter featuring H₂Okinetic® Spray
- Designed for easy flushing of plumbing system prior to installation of trim
- Allows for pressure-balanced or thermostatic cartridge
- Additional outlet allows for handshower, In2ition® Shower, additional showerhead or XO Jet Module™ installation
- High-flow rough for use with shower only options, not for use with a tub spout
- ASSE 1016/ASME A112.1016/CSA B125.16

MultiChoice® Universal (R10000-UNBXHF)

- 1/2" rough-in
- Installs during rough-in phase of project
- Allows for pressure testing of system
- Designed for easy flushing of plumbing system prior to installation of trim
- Allows for pressure-balanced or thermostatic cartridge
- HF=high flow, for use with shower only options, not for use with a tub spout
- Thermostatic Cartridge Flow Rate: 6.3 gpm @ 45 psi, 7.2 gpm @ 60 psi, 8.3 gpm @ 80 psi
- ASSE 1016/ASME A112.1016/CSA B125.16

Diverter Rough (R1827-XO)

for Jetted Tub/Shower Applications Only

- 1/2" rough-in
- Installs during rough-in phase of project
- Rough for one jet module diverter featuring H₂Okinetic Technology
- Additional outlet allows for handshower, In2ition Shower, additional showerhead or XO Jet Module installation

- Must order when ordering R10000-UNBXHF rough for separate tub and shower configurations

XO Jet Module Rough (R1817)

- 1/2" rough-in
- Installs during rough-in phase of project
- Horizontal or vertical mount
- Thick- or thin-wall mount (maximum 1-1/4" thickness)
- Adjustable H₂Okinetic spray jets rotate 30°
- 2.5 gpm @ 80 psi
(Each jet flows at 1.25 gpm @ 80 psi)

Diverter Rough Valve (R11000)

- 1/2" rough-in
- 3-port, 6-setting diverter: 3 individual positions, 3 shared positions—use any two options at one time or any one individually; ships with trim
- 2-port, 3-setting diverter: 2 individual positions, 1 shared position—use two options at one time or each one individually; ships with trim
- 3-port, 3-setting diverter: 3 individual positions—use each option individually
- 2-port, 2-setting diverter: 2 individual positions—use each option individually
- Installs during rough-in phase of project

H₂Okinetic Body Spray (T50001/R50001 or T50050/R50001)

- Self-cleaning H₂Okinetic Spray Jet
- 360° rotational adjustment, pivots 30°
- No internal moving parts
- Experience of 2.5 gpm at 1.6 gpm @ 80 psi

Body Spray (50102 and 50150)

- Surface-mount spray threads onto 1/2" pipe nipple
- 360° rotational adjustment, pivots 30°
- Does not require rough-in
- Installs during trim phase of project
- Touch-Clean® spray holes
- 2.0 gpm @ 80 psi

Installation and technical information

Body Jet (50101 and 50100)

- Surface-mount jet threads onto a 1/2" pipe nipple
- Pivots 30° all directions
- Does not require rough-in
- Installs during trim phase of project
- Touch-Clean® spray holes
- 1.8 gpm @ 80 psi

H₂Okinetic® Showerheads

- H₂Okinetic showerheads sculpt water into a unique wave pattern that creates the feeling of more water without using more water
- Experience a luxurious, indulgent shower that blankets the body with water
- 1.5 gpm water-efficient showerhead options are not recommended for use with a thermostatic cartridge
- 2.5 gpm @ 80 psi
- 2.0 gpm @ 80 psi
- 1.5 gpm @ 80 psi

Full Body Spray Showerhead

- Full Body Spray setting provides consistent flow from all spray holes to surround the user in a curtain of water
- Touch-Clean spray holes allow the user to easily wipe away calcium and lime buildup with the touch of a finger
- 2.5 gpm @ 80 psi, 2.0 gpm @ 80 psi

Five-Setting Showerhead/Handshower

- Settings for showerhead 52683: Pause, Soft Drench Spray, Full Body Spray, Massage Spray, and Full Body/Massage
 - Pause feature slows the water to a trickle
 - Soft Drench Spray setting provides a soft, aerated spray that soaks the user with a soothing flow of water
 - Full Body Spray setting provides consistent flow from all spray holes to surround the user in a curtain of water
 - Massage Spray setting provides a pulsating spray that revitalizes and rejuvenates the user
 - Full Body/Massage Spray setting combines the experience of the Full Body and Massage sprays

- Settings for showerhead 52678-PK, and handshowers 51508, 59515, 59355-PK: Pause, Soft Drench Spray, Full Body Spray, Fast Massage, and Full Body/Massage
 - Fast Massage Spray setting provides a quick, pulsating spray that revitalizes the user
- Settings for showerhead 52635-PK: Soft Drench Spray, Soft Drench/Massage, Full Body Spray, Massage Spray, and Full Body/Massage
 - Soft Drench/Massage combines the pulsation of the Massage Spray with the soaking coverage of the Soft Drench Spray for a soothing rejuvenation
- Settings for showerhead 52634-20-PK and handshowers 54434-20-PK, 59434-20-PK: Pause, Full Body Spray, Fast Massage, Full Body/Massage, and High-Efficiency
 - High-Efficiency Spray provides full coverage and feels like greater water pressure at lower flow rates
- Settings for handshowers 51505-DS, 54435-PK, 59435-PK: Full Body Spray, Fast Massage, Soft Drench Spray, Slow Massage, and Shampoo Rinsing Spray
 - Slow Massage Spray setting provides a soothing, pulsating spray that rejuvenates the user
 - Shampoo Rinsing Spray setting provides a strong, full body spray, perfect for rinsing thick hair
- 69° hose allows users to direct water where they want it
- Slide bar models feature wall bar with adjustable slide
- Some models feature SOFT-TOUCH® grip and insulated handle
- All models except “handshower only” include hose and vacuum breaker
- Touch-Clean spray holes allow the user to easily wipe away calcium and lime buildup with the touch of a finger
- 2.5 gpm @ 80 psi

Three-Setting Showerhead/Handshower

- Settings: Full Body, Massage, and Soft Drench
 - Full Body Spray setting provides consistent flow from all spray holes to surround the user in a curtain of water
 - Massage Spray setting provides a pulsating spray that revitalizes and rejuvenates the user

- Soft Drench Spray setting provides a soft, aerated spray that soaks the user with a soothing flow of water

Raincan Showerhead with Full Body Spray

- Full Body Spray setting provides consistent flow from all spray holes to surround the user in a curtain of water
- Touch-Clean spray holes allow the user to easily wipe away calcium and lime buildup with the touch of a finger
- 2.5 gpm @ 80 psi

Raincan Showerhead with Soft Rain Spray

- Soft Rain Spray setting has wide, soaking spray that cascades over the user like raindrops from a gentle spring shower
- Touch-Clean spray holes allow the user to easily wipe away calcium and lime buildup with the touch of a finger
- 2.5 gpm @ 80 psi

In2ition® Shower—Two Showers in One

- Models 58045, 58469-PK, 58468, 58466, 5 settings: Full Body, Fast Massage, Slow Massage, Full Body/Massage, and Pause
 - Full Body Spray setting provides consistent flow from all spray holes to surround the user in a curtain of water
 - Fast Massage Spray setting provides a quick, pulsating spray that revitalizes the user
 - Slow Massage Spray setting provides a soothing, pulsating spray that rejuvenates the user
 - Full Body/Massage Spray setting combines the experience of the Full Body and Massage sprays
 - Pause feature slows the water to a trickle
- Models 58065, 58464-PK, 58467, 4 settings: Full Body, Massage, Full Body/Massage, and Pause
 - Full Body Spray setting provides consistent flow from all spray holes to surround the user in a curtain of water
 - Massage Spray setting provides a pulsating spray that revitalizes and rejuvenates the user
 - Full Body/Massage Spray setting combines the

experience of the Full Body and Massage sprays

- Pause feature slows the water to a trickle
- Models 58469-PK and 58464-PK feature fully plated backplate
- Models 58470, 58471-PK, 58472, 4 settings:
 - H₂Okinetic Full Spray
 - H₂Okinetic Full Spray + Massage
 - Massage
 - Pause

Handshower with Full Body Spray

- Full Body Spray setting provides consistent flow from all spray holes to surround the user in a curtain of water
- 69" UltraFlex® hose or 60"–82" stretchable stainless steel hose allows users to direct water where they want it
- Slide bar models feature wall bar with adjustable slide
- All models except "handshower only" include hose and vacuum breaker
- Touch-Clean spray holes allow the user to easily wipe away calcium and lime buildup with the touch of a finger
- 2.5 gpm @ 80 psi, 2.0 gpm @ 80 psi

H₂Okinetic Raincan Showerhead

- Raincan with H₂Okinetic spray sculpts water into a unique wave pattern that creates the feeling of more water without using more water
- Utilizes larger droplets that retain their heat longer and create a denser spray pattern
- Experience a luxurious, indulgent shower that blankets the body with water
- 2.5 gpm @ 80 psi, 2.0 gpm @ 80 psi

Nine-Setting Showerhead

- Settings: Pause, Fast Massage, Full Body Spray, Full Body/Massage, Soft Drench Spray, Soft Drench/Massage, Soft Full Spray, Shampoo Rinsing Spray, Shampoo Rinsing Spray/Massage
 - Pause feature slows the water to a trickle
 - Fast Massage Spray setting provides a quick, pulsating spray that revitalizes the user
 - Full Body Spray setting provides consistent flow from all spray holes to surround the user in a curtain of water

Installation and technical information (continued).

- Full Body/Massage Spray setting combines the pulsation of the Massage Spray and the coverage of the Full Body Spray for warmth and relaxation
- Soft Drench Spray setting provides a soft, aerated spray that soaks the user with a soothing flow of water
- Soft Drench/Massage combines the pulsation of the Massage Spray with the soaking coverage of the Soft Drench Spray for a soothing rejuvenation
- Soft Full Spray setting provides a soft, consistent pressure from all spray holes to soothe the user
- Shampoo Rinsing Spray setting provides a strong, full body spray, perfect for rinsing thick hair
- Shampoo Rinsing Spray/Massage Spray setting combines the pulsation of the Massage Spray with the coverage of the Shampoo Rinsing Spray
- Touch-Clean® spray holes allow the user to easily wipe away calcium and lime buildup with the touch of a finger
- 2.5 gpm @ 80 psi

H₂Okinetic® Five-Setting Handshower

- Settings: Pause, H₂Okinetic Spray, Massage, Full Body/Massage, Full Body Spray
 - Pause feature slows the water to a trickle
 - H₂Okinetic Spray sculpts water into a unique wave pattern that creates the feeling of more water without using more water
 - Massage Spray setting provides a pulsating spray that revitalizes and rejuvenates the user
 - Full Body/Massage Spray setting combines the pulsation of the Massage Spray and the coverage of the Full Body Spray for warmth and relaxation
 - Full Body Spray setting provides consistent flow from all spray holes to surround the user in a curtain of water

H₂Okinetic Three-Setting Handshower

- Settings: Pause, H₂Okinetic Spray, Massage
 - Pause feature slows the water to a trickle
 - H₂Okinetic Spray sculpts water into a unique wave pattern creating the feeling of more water without using more water
 - Massage Spray setting provides a pulsating spray that revitalizes and rejuvenates the user

H₂Okinetic Handshower

- H₂Okinetic Spray sculpts water into a unique wave pattern that creates the feeling of more water without using more water
- 2.0 gpm @ 80 psi

Seven-Setting Showerhead

- Settings: Pause, Fast Massage, Full Body Spray, Full Body/Massage, Soft Drench Spray, Soft Drench/Full Body, Shampoo Rinsing Spray
 - Pause feature slows the water to a trickle
 - Fast Massage Spray setting provides a quick, pulsating spray that revitalizes the user
 - Full Body Spray setting provides consistent flow from all spray holes to surround the user in a curtain of water
 - Full Body/Massage Spray setting combines the pulsation of the Massage Spray and the coverage of the Full Body Spray for warmth and relaxation
 - Soft Drench Spray setting provides a soft, aerated spray that soaks the user with a soothing flow of water
 - Soft Drench/Full Body combines the experience of the two sprays for a soothing rejuvenation
 - Shampoo Rinsing Spray setting provides a strong, full body spray, perfect for rinsing thick hair
- Touch-Clean spray holes allow the user to easily wipe away calcium and lime buildup with the touch of a finger
- 2.5 gpm @ 80 psi

Technical notes.

Note 1: When more than one valve is being used in a system, do not tee from the 1/2" water supplies to accommodate the second valve. Each valve should be plumbed directly from the main water supply.

Note 2: Water pressure is very important to the performance of the semi-custom and custom shower systems featured in this guide. Water pressure should be a minimum of 45 psi. We do not recommend installing any of these showers on a well system. The water pressure and water volume that is delivered by a well system is usually not adequate for the demands of custom shower systems. As a result, you may have an unhappy customer.

Note 3: It is against national codes to remove the flow restrictor from any outlet device. There are cases where homeowners remove the restrictor, but Delta® strongly discourages against this practice. Removing the flow restrictor will upset the balance of the system you design, negatively impact system performance, and void the warranty.

Note 4: When using two or more body sprays we recommend a pressure balancing loop (see Figure 1).

Note 5: Installation must be in accordance with local plumbing codes. System performance varies with local supply.

Note 6: Using multiple elbows can decrease flow from the outlets
