Since 1924, Radiator Specialty Company has been making quality Automotive, Industrial, and Household Lubricating and Chemical Products.

Making Affordable Performance Chemicals

Family Tradition from Humble Beginnings with Social Responsibility

In 1924 traveling salesman, I.D. Blumenthal, developed a leak in his radiator while traveling through Charlotte, North Carolina. A local tinsmith poured a magic powder in his radiator and the leak stopped. From that chance meeting, a partnership was formed.

They began making the product in a small shed. New products were developed over time. Blumenthal was joined in 1937 by his younger brother, Herman, a union that lasted over 40 years. Wartime production included rubber parts for every type of U.S. warplane. Over the decades Radiator Specialty grew through product innovation and strategic acquisitions, including GUNK® and Liquid Wrench® brands.... two of the most widely-recognized brands in automotive aftermarket chemicals.

Over the last decade the company has manufactured over 2000 products and expanded into a variety of markets including automotive, plumbing and hardware, truck and heavy duty, and international.

This family-owned company takes pride in providing long-term employment opportunities and other ways of giving back to the community.

500,000 Square Foot Manufacturing & Distribution to ISO Standards

Radiator Specialty Company began manufacturing in 1924 in the small shed pictured above and has grown into a modern and expansive facility at Indian Trail, North Carolina. Situated on a large and expandable tract, the manufacturing plant operates ten flexible production lines to meet the growing demand for branded and private label products.

Radiator's inbound and outbound logistics uses modern material handling equipment, a real-time database and enterprise automation system, and a well-trained workforce. Dozens of inbound and outbound loading bays are available to facilitate fast, efficient, just-in-time deliveries. Some inventory space is maintained for client inventory needs.

ISO 9001:2000 registration supports our pursuit of continuous improvement and an on-going commitment to provide our customers assurance of product quality. Our success in achieving this goal is due to the tremendous dedication and teamwork of our employees.

Dedicated to Research & Development

Today's markets and customers require innovative technology and operational flexibility, plus knowledge of regulations, consumer and merchandising trends and marketing methods.

Radiator Specialty employs a large staff of chemists and technicians lead by a PhD scientist. They develop and test formulas that satisfy customer needs, to create new products, to achieve price/cost targets. Others develop and test packaging for appearance, effectiveness, and value.

Radiator achieves product traceability in all aspects of laboratory, material handling, and quality control procedures.

Chemicals and Lubricants for Over 80 Years

Always a Philosophy of Quality for Affordable Prices

Radiator Specialty Company is a vertically integrated formulator, producer, and filler of lubricants, chemicals and additives to the automotive, plumbing, hardware, industrial, and export markets. By keeping many skills and production capabilities under its own roof, the company is able to deliver high-quality products, which meet their cost targets and thus meet or beat competitive offerings in the marketplace.

Since creating its first product in 1924, Radiator Specialty has excelled in delivering quality, affordable and dependable products that make things work better.

Makers and Marketers of our Own Branded Products

Over the years, Radiator Specialty Company has developed hundreds of successful products, and acquired other companies and brands. Among the most widely recognized brands are Gunk®, Liquid Wrench®, SolderSeal®, PunctureSeal® and Tite-Seal®.

Radiator Specialty Company is one of the few remaining companies that founded the automotive aftermarket industry for lubricants and chemicals.

The company has also licensed its brands for sale elsewhere around the world, which meet the needs of consumers in over 80 countries.

Producing Private-Label Products for Others

Radiator Specialty Company is a good source to develop and produce a broad array of chemicals and lubricating products for other businesses. Radiator develops and fills private-label products of every type, including cleaning products, lubricants, degreasers, and chemicals for applications in automotive, household, industrial, diesel/heavy-duty trucks, plumbing, hardware, and more.

Radiator Specialty Company products can provide a complete array of services to other companies including contract-packaging, package design, research and development of formulations, product testing, package testing, distribution/warehousing and marketing services.

Radiator also sells products in bulk for packaging by others both domestically and internationally.

Engine Brite®

Degreasers & Parts Cleaners

Engine Brite® Original HD Engine Degreaser

- ▶ The World's #1 Selling Engine Degreaser!
- ▶ Heavy duty cleaning formula is packed with powerful degreasing solvents that quickly and easily removes the toughest grease, dirt, and grime.
- ▶ Designed for older, greasy engines.

EB1	15 oz.	12/Case
