GIANT ADVANTAGES

Recognized as the world's leading manufacturer of submersible electric motors since 1944, Franklin Electric has grown into a water systems enterprise providing innovative products for a multitude of applications across the globe. North American markets include groundwater, plumbing, hvac, agriculture, and municipal. Franklin Electric provides pumping solutions to these primary markets, which include pumps, motors, drives, controls, protection equipment, and packaged systems.

For over 70 years professionals in the water transfer market have trusted the Little Giant brand for its reliable pump solutions, packaged system options, accessories, and total value. With a vast offering of sump, sewage, effluent products; dewatering and trash pumps; condensate pumps; magnetic drive pumps; low pressure sewer systems; water garden products and a wide variety of utility pumps, Little Giant is the brand of choice to hundreds of thousands worldwide representing Franklin's commitment to quality, innovation, availability, and service.

Corporate Headquarters
Serving all corners of the world with more than
14 manufacturing and distribution facilities.

Our 200,000 sq ft centrally located warehouse in Oklahoma City enables fast and complete fill rates.

Franklin Electric engineers design products for easy installation, high performance, long life, and exceptional value.

More than 4,300 responsive employees are ready to offer expert assistance.

LittleGIANT®

UTILITY PUMPS

Whether it's for dewatering a waterbed or a storm cellar, circulating water for welding and pipe threading machines, pumping mild chemicals such as soaps or fertilizers, or meeting the highly specialized applications found in pressure-washers and carpet-cleaners, Little Giant's general purpose utility pumps are the true generals of efficiency and reliability.

UTILITY PUMPS

PONY PUMP® SERIES 1/10 HP

APPLICATIONS

- Commercial, industrial, and home uses where liquid must be transferred

FEATURES

- Self-priming for instant delivery or dewatering up to 6' (1.8 m)
- Non-submersible stainless steel or plated brass pump body
- Rugged metallic handle or easy portability
- Dual threaded intake and discharge with both 3/4" (19 mm) male garden hose thread and 3/8" FNPT (9.5 mm)
- Model 360K includes pump, hose, strainer, and suction adapter
- Pump only models available with separate kit options
- cULus listing on models 555502, 555103, 555507, and 555122

UTILITY PUMPS

UPSP SERIES 1/2 HP

APPLICATIONS

- Pressure boosting for washing vehicles • Flooded basements
- Watering lawns • Draining water heaters

FEATURES

- Non-submersible, inline, portable utility transfer pump with rugged one-piece cast iron housing and integral carrying handle
- Self-priming to 15' (4.6 m) when priming chamber is filled
- Can also be used to boost water pressure for washing vehicles, sidewalks, and more
- Convenient 3/4" (19 mm) brass garden hose adapters on intake and discharge
- Engineered thermoplastic impeller
- 3/4" (19 mm) FNPT discharge
- 140 °F (60 °C) liquid temperature rating
- cCSAus listed

5 SERIES 1/6 HP

APPLICATIONS

- Commercial, industrial, and home uses where water must be transferred or recirculated

FEATURES

- 1/6 hp shaded pole motor with overload protection
- Designed for continuous duty
- Pumps down to 1/8" (38 mm)
- 1" FNPT (25.4 mm) discharge
- Removable inlet screen for easy cleaning
- Multiple switch options for automatic operation
- Multiple power cord lengths available
- 120 °F (49 °C) liquid temperature rating
- cCSAus on models 505300, 505350, 505400, 505486, 505000, 505025, and 505176

A photograph of a living room interior. In the foreground, a dark brown leather sofa with several light-colored pillows is visible. Behind the sofa is a large wooden entertainment center. The center features a large arched opening in the middle containing a television. To the left of the TV are glass-fronted cabinets filled with books and other items. To the right are more open shelves with decorative objects. The room is dimly lit, with warm light coming from the TV area and some shelves.

SUMP PUMPS

Removing standing water from a sump basin in a basement or crawl space are typical uses of Little Giant's sump pumps, but they can also be used in many other applications for general dewatering and water transfer such as storm shelters, transformer vaults, and laundry trays to name a few. With several horsepower, performance, and switch options, Little Giant sump pumps offer reliable solutions making them more than just sump pumps.

SUMP PUMPS

5.5 SERIES 1/4 HP

APPLICATIONS

- Basement sumps

FEATURES

- Shaded pole motor with thermal overload protection
- Oil-filled motor housing
- Integral snap-action float switch
- 1-1/4" FNPT (31.7 mm) discharge
- Screened inlet handles up to 3/8" (9.5 mm) solids
- 3/4" GHT (19 mm) garden hose adapter included
- 120 °F (49 °C) liquid temperature rating
- cCSAus listed

SUMP PUMPS

ESP33 SERIES 1/3 HP

APPLICATIONS

- Basement sumps • Dewatering • Water transfer • Light effluent

FEATURES

- Oil-free motor with thermal overload protection
- Designed for continuous duty
- Cast iron or thermoplastic motor cover and casing options
- Permanently lubricated upper/lower ball bearings with double lip seal
- 5 vane impeller
- 1-1/2" FNPT (38 mm) discharge, 1-1/4" (31.7 mm) reducer bushing included
- Handles up to 1/2" (12.7 mm) solids
- Multiple switch options for automatic operation

SUMP PUMPS

6 SERIES 1/3 HP

APPLICATIONS

- Basement sumps • Dewatering • Water transfer

FEATURES

- Shaded pole motor with thermal overload protection
- Designed for continuous duty
- Oil-filled motor housing
- PVC riser legs (506162 only)
- 1-1/2" FNPT discharge (38 mm)
- 1-1/4" FNPT (31.7 mm) hose adapter included
- 3/4" GHT garden hose adapter included (506266, 506267, 506271, 506274 only)
- cCSAus listed (115 v models only)

SUMP PUMPS

VS-P SERIES 1/3 HP

APPLICATIONS

- Basement sumps • Dewatering • Water transfer

FEATURES

- Thermal overload protected motor
- Designed for continuous duty
- 1-1/4" FNPT (31.7 mm) discharge
- Handles up to 1/4" (6 mm) solids
- Adjustable snap-action float switch
- 140 °F (60 °C) liquid temperature rating
- cCSAus listed

SUMP PUMPS

6EN SERIES 1/3 HP

APPLICATIONS

- Basement sumps • Dewatering
- Water transfer • Light effluent

FEATURES

- Permanent split capacitor (PSC) motor with thermal overload protection
- Designed for continuous duty
- 1-1/2" FNPT discharge (38 mm)
- Handles up to 1/2" (12.7 mm) solids
- Multiple switch options for automatic operation
- cCSAus listed

SUMP PUMPS

TSW SERIES 1/3 HP

APPLICATIONS

- Basement sumps • Flood control

FEATURES

- Permanent split capacitor motor
- Designed to be installed suspended from basin cover
- Non-corrosive construction
- Integral IntelliPlug® provides high water alarm light and 85 dba alarm with run light built in
- Leg kit raises up 2-1/4" (5.7 cm) if not used in basin
- 1-1/2" FNPT (38 mm) discharge
- Side screened inlet
- 140 °F (60 °C) liquid temperature rating
- cCSAus listed

BATTERY BACK-UPS

TSW-APS 1/3 HP

APPLICATIONS

- Basement sumps • Flood control

FEATURES

- Eliminates need and cost of installing a "back-up" pump that operates when power is out.
- Converts pump to DC power in the event of a power failure
- Includes inverter, battery box, and battery cover strap (battery not included)

Item No.	Model
507701	TSW-APS

SYSTEMS & COMPONENTS

TSW-A Series - System includes: Pump, clear view cover, and discharge kit with clear check valve

507709, TSW-A22 (For use with 22" (56 cm) basin #507705, TSW-B1822A)

507710, TSW-A30 (For use with 30" (76 cm) basin #507707, TSW-B1830A)

TSW-B Series - System includes: Pump, 22" or 30" (56 cm or 76 cm) basin, clear view cover assembly, and discharge kit with clear check valve

507711, TSW-B22A [22" (56 cm) unit]

507713, TSW-B30A [30" (76 cm) unit]

TSW-C Series - System includes: Pump, clear view cover assembly, discharge kit with clear check valve, and Auxiliary Power System (TSW-APS)

507715, TSW-C22 [For use with 22" (56 cm) basin #507705, TSW-B1822A]

507716, TSW-C30 [For use with 30" (76 cm) basin #507707, TSW-B1830A]

TSW-D Series - System includes: Pump, 22" or 30" (56 cm or 76 cm) basin, clear view cover assembly, discharge kit with clear check valve, and Auxiliary Power System (TSW-APS)

507717, TSW-D22A [22" (56 cm) unit]

507719, TSW-D30A [30" (76 cm) unit]

Component Variations Available:

Basin Capacity (approx.)	22" (56 cm) basin – 22 gallons 30" (76 cm) basin – 30 gallons
Discharge Size	1-1/2" (38 mm)
Intake Size	4" Adapt-A-Flex**

** 4" hub available as an option

SUMP PUMPS

WRS SERIES 1/6 HP, 1/3 HP, 4/10 HP

Drainosaur® & Drainosaur Jr.®

APPLICATIONS

- Impractical drainage areas
- Under sinks
- Laundry trays

FEATURES

BASIN FEATURES

- 3.5 and 5 gallon size options
- Polypropylene, lightweight, corrosion resistant
- Designed with O-rings for water tight seal
- Cover includes removable filter for easy cleaning
- Cover includes 1/1/2" FNPT (38 mm) discharge and intake opening, and 2" FNPT (5 cm) vent opening
- IAPMO listed
- Pre-assembled, ready to install

PUMP FEATURES

- 1/6, 1/3, 4/10 hp options
- Multiple switch options
- cCSAus listed (pump only)

SUMP PUMPS

CS-SS SERIES 1/3 HP

APPLICATIONS

- Residential crawl spaces • Low lying areas

FEATURES

PACKAGE FEATURES

- 1/3 hp cast iron pump with overload protection
- 18" x 22" (46 cm x 56 cm) light weight perforated polypropylene basin
- Structural foam cover with slip fit flanges
- 1-1/4" x 24' (31.7 mm x 7.3 m) discharge hose kit
- 1-1/2" MNPT (38 mm) barbed check valve
- cCSAus listed (pump only)

SUMP PUMPS

APS-115 BATTERY BACK-UP SYSTEMS

APPLICATIONS

- Sump, effluent, and sewage pump power backup system

FEATURES

- Fully automatic charging system
- Powers existing sump, effluent or sewage pump in the event of a power outage
- Operates 115 Volt pump up to 1/2 hp
- Advanced charging system that maintains battery voltage by timed increments resulting in maximized battery life
- Batteries not included
- Easy installation with no modification or piping changes to existing pumping system
- Microprocessor monitors all electrical functions
- Indicator lights (LED) for:
 - Inverter light
 - Charge light

CONSTRUCTION FEATURES

- Quality 16 gauge steel enclosure
- Baked-on epoxy finish inside and out to prevent corrosion
- Hinged door for easy battery access
- Two piece construction for ease of installation
- Weight:
 - Power head weight 70 lbs
 - Battery enclosure weight 25 lbs

Spec Sheet 995236

SUMP PUMPS

SPBS-12 BATTERY BACK-UP SYSTEMS

APPLICATIONS

- Secondary sump pump • Flood protection
- Emergency dewatering

FEATURES

- 12 Volt DC pump
- The back-up system is powered by a 12 Volt DC battery (not included). The battery used should be a deep cycle marine battery rated from 105 to 140 amp-hours. A 140 amp-hour battery can provide in excess of nine (9) hours of continuous operation.
- Controller/Charger/Alarm, 10 amp
- A controller/charger monitors the battery condition and charges the battery when required. It also alerts the homeowner when the system has operated or when possible flooding conditions exist.
- Audible alarm:
 - When pump runs (must be reset)
 - When battery is discharged
- Indicator lights (LED) for:
 - Power on
 - Battery charging
 - Battery fully charged
- Float switch
- Check valve for 12 volt pump
- PVC tee for connection to existing 1-1/2 discharge pipe of primary pump
- Battery box (battery not included)
- Pump mounting bracket and clamp

SUMP PUMPS

OS3 SERIES (OIL SENSING SUMP SYSTEM)

APPLICATIONS

- Ideal for elevator sump pits, transformer vaults, and water-and-oil prone confined spaces in accordance with ASME - A17

FEATURES

- Multiple indicator lights; power, pump run, high-water; high oil, pump overload
- Single-piece sensor for easy installation
- ASME - A17 compliant
- Includes remote alarm
- Alarm panel can be connected to Oil Sensing Sump System's remote panel which contains audio/visual alarming
- Both the main panel and remote alarm panel have auxiliary contacts for connection to a building's automation system or SCADA system

EFFLUENT PUM

Dewatering, water transfer, effluent and wastewater removal can all be handled with Little Giant effluent pumps. Ranging from 1/3 hp to 2 hp and shut-offs of 7' to 250', Little Giant offers more performance choices for the job.

IPS

EFFLUENT PUMP

6EN SERIES 1/3 HP

APPLICATIONS

- Basement sumps • Dewatering
- Water transfer • Light effluent

FEATURES

- Permanent split capacitor (PSC) motor with thermal overload protection
- Designed for continuous duty
- 1-1/2" FNPT discharge (38 mm)
- Handles up to 1/2" (12.7 mm) solids
- Multiple switch options for automatic operation
- cCSAus listed

EFFLUENT PUMP

HT-10E HIGH TEMPERATURE 1/2 HP

APPLICATIONS

- Boiler blow-down • Effluent wastewater removal • Sump pits
- Transformer vaults

FEATURES

- Split-phase motor
- Oil-filled motor housing
- Designed for continuous duty
- Handles solids up to 3/4" (19 mm) diameter
- Up to 200 °F (93 °C)
- CSA listed

SERIES SPECIFICATIONS

EFFLUENT PUMP

ESP50 SERIES 1/2 HP

APPLICATIONS

- Effluent wastewater removal • Dewatering
- Water transfer

FEATURES

- Oil-free motor
- Designed for continuous duty
- Handles solids up to 3/4" (19 mm) diameter
- 1-1/2" NPT (38 mm) discharge
- Multiple switch options for automatic operation
- 120 °F (49 °C) liquid temperature rating
- cCSAus listed

EFFLUENT PUMP

14EH/16EH SERIES 1/2 HP, 1 HP

APPLICATIONS

- Effluent wastewater removal • Dewatering
- Water transfer

FEATURES

- Permanent Split Capacitor (PSC) ball bearing motor
- High speed 3450 rpm
- Completely submersible, designed for continuous duty
- High head model
- 2" FNPT (51 mm) discharge
- Handles solids up to 3/4" (19 mm) diameter
- 140 °F (60 °C) liquid temperature rating
- cCSAus listed (514550 CSA only)

EFFLUENT PUMP

WE SERIES 1/2 HP

APPLICATIONS

- High head filter effluent • Filtered effluent service • Aeration
- Ornamental fountains • Water fountains

FEATURES

- Franklin Electric submersible motor
- Heavy duty, 300 V, 10' (3 m) SJOW motor stripped leads
- Removable built-in check valve
- Non-corrosive thermoplastic discharge and motor brackets
- Proven "PPO" staging allows close tolerances and increased performance
- High quality top bearing for maximum durability and years of reliable service
- Hex rubber bearing has extra-large surface for shaft stability and multiple flow channels for keeping particles away from bearing surfaces
- Stainless steel up thrust washer prevents excessive wear in service applications
- cCSAus listed

PERFORMANCE DATA

CONSTRUCTION

Motor Housing	Stainless steel
Impeller Material	Celcon
Diffuser	Glass-filled PPO
Power Cord	10' SJOW
Check Valve	Celcon
Fasteners	Stainless steel
Shaft	Stainless steel
Bearings	PEEK
Discharge	Glass-filled polypropylene

APPLICATIONS

- Dewatering • Flood irrigation • Livestock watering
- Installations with septic tanks in areas with drainage problems

FEATURES

- Higher than NEMA service factor dual compartment motor
- Designed for continuous duty
- Built-in check valve
- Handles solids up to 1/4" (6.4 mm) diameter
- 1-1/4" (31.75 mm) NPT discharge
- 120 °F (49 °C) liquid temperature rating
- CSA listed

A rustic study with wood paneling, a clock, and a desk. The room features a wooden door, a round clock on the wall, and a desk with a lamp and a chair. The walls are covered in wood paneling, and the ceiling has exposed wooden beams.

SEWAGE PUMP

It's a dirty job, but Little Giant sewage pumps are made for the tough and demanding task of effluent and wastewater transfer. For the home or in commercial or industrial applications, Little Giant sewage pumps are designed with durability, reliability, and efficiency as the number one key advantages over the competition. With choices between 4/10 to 2 hp, manual operation or automatic, multiple switch options, and the performance shut-off ranges between 18' and 130', these pumps are up to the task.

S

SEWAGE PUMPS

9SN SERIES 4/10 HP

APPLICATIONS

- Sewage and effluent wastewater transfer • Dewatering

FEATURES

- Permanent Split Capacitor (PSC)
- Energy-saving low amp draw
- Cooler running motor
- Designed for continuous duty
- 2" FNPT (51 mm) and 3" FNPT (76.2 mm) discharge models
- Handles solids up to 2" (51 mm) diameter
- Multiple switch options for automatic operation
- 140 °F (60 °C) liquid temperature rating
- cCSAus listed

SEWAGE PUMPS

WSV52 SERIES 1/2 HP

APPLICATIONS

- Ideal for handling raw sewage
- Commercial dewatering sump applications with up to 2" solids

FEATURES

- Oil-free permanent split capacitor (PSC) motor
- Designed for continuous duty
- 2" FNPT (51 mm) discharge
- Handles solids up to 2" (51 mm) diameter
- Power cord sealed at motor housing
- 140 °F (60 °C) liquid temperature rating
- cCSAus listed

SEWAGE PUMPS

WS SERIES 1/2 HP, 1 HP

APPLICATIONS

- Ideal for handling raw sewage
- Commercial dewatering sump applications with up to 2" solids

FEATURES

- All cast iron construction
- Oil-filled motor with double ball bearing capacitor start designed for high torque with automatic reset (single-phase only)
- Designed for continuous duty
- Switch options for automatic operation
- 2" (50 mm) NPT
- Handles solids up to 2" (51 mm) diameter
- Power cord sealed at motor housing
- 120 °F (49 °C) liquid temperature rating
- cCSAus listed

PERFORMANCE DATA

CONSTRUCTION

Cover	Epoxy-coated cast iron
Motor Housing	Epoxy-coated cast iron
Impeller Material	Red brass
Impeller Type	Non-clog vortex
Volute	Epoxy-coated cast iron
Mechanical Shaft Seal	Carbon/ceramic
Fasteners	Stainless steel
Shaft	Stainless steel
Bearings	Upper and lower ball bearings
Power Cord	14/3, SOW (1-phase); 14/4, SOW (3-phase)

SEWAGE PUMPS

20S SERIES 2 HP

APPLICATIONS

- Sewage and effluent wastewater transfer • Dewatering

FEATURES

- Permanent Split Capacitor (PSC)
- Designed for continuous duty
- Capacitor and power cord connections are isolated from oil-filled motor housing for ease of field maintenance
- 3" FNPT (761 mm) discharge
- Handles solids up to 2" (51 mm) diameter
- 140 °F (60 °C) liquid temperature rating
- cCSAus listed

Cover	Epoxy-coated cast iron
Motor Housing	Epoxy-coated cast iron
Impeller Material	Red brass
Impeller Type	Vortex
Volute	Epoxy-coated cast iron
Mechanical Shaft Seal	Carbon/ceramic
Fasteners	Stainless steel
Shaft	Stainless steel
Bearings	Upper and lower ball bearings
Power Cord (Stripped Leads)	14/3, SOW (1-phase); 14/4, SOW (3-phase)

APPLICATIONS

- Collection of sewage, effluent, drainage, or seepage water

FEATURES

- Roto-molded polyethylene basin
- Radial rib design for extra strength
- 360° molded handle for easy handling
- Molded torque stops at basin bottom to secure pump
- Anti-flotation collar
- 4" molded external inlet hub for flexible coupling
- Structural foam or IAPMO approved steel cover options available
- One- or two-piece cover options available
- Slip-fit or bolt-on cover flange options available
- 4/10 hp or 1/2 hp sewage pump options available
- Basin size: 24" x 24" (61 cm x 61 cm)

TYPICAL INSTALLATION

SEWAGE PLUMBERS

SIMPLEX AND DUPLEX SYSTEMS

APPLICATIONS

- Collection of sewage, effluent, drainage or seepage water

FEATURES

- Basins available in high density polyethylene structural foam [18" (46 cm), 24" (61 cm), & 30" (76 cm) dia.] or fiberglass [36" (9.14 cm) dia]
- Complete with necessary sealing hardware and flanges
- Available with 2" or 3" (51 mm or 76 mm) vent or discharge flange
- 4" inlet hub is included with the basin
- Water-tight and gas-tight when properly installed
- Durable steel gasketed cover standard on simplex and duplex basins
- One-piece, seam-free construction on basin
- Duplex covers include two access plates
- Ready-to-install for simple and economical installation
- Temperature rated up to 130 °F (54.4 °C)

SEWAGE PUMPS

WCR SERIES WATER COLLECTION & REMOVAL SYSTEMS

APPLICATIONS

- Collection of sewage, effluent, drainage or seepage water

FEATURES

- Pre-packaged 20" x 30" (51 mm x 76 mm) polyethylene basin with 4/10 hp sewage pump
- Handles up to 2" (51 mm) solids
- Options of structural foam or steel covers
- Includes schedule 40 PVC discharge piping with pre-drilled air-bleed hole
- Designed with side outlets for discharge and electrical cords
- Includes 2" (51 mm) bulkhead fitting to easily route power cords out of basin
- Once installed, no digging required for system servicing
- cCSAus listed pump only

GRINDER PUMP

If you have an application with high head conditions or difficult soil topography... Little Giant grinder pumps are designed with over 414,000 cuts per minute and a shut-off of 130'. These pumps are equipped to handle the demands of grinding domestic sewage whether as a replacement pump or a packaged system...another trusted, reliable product for a tough, demanding job.

GRINDER PUMPS

GP SERIES 2 HP

APPLICATIONS

- Low pressure sewer applications
- Sewage wastewater transfer for light commercial or residential applications

FEATURES

- Patented cutting system providing tight cutting clearances for superior cutting action grinding 414,000 cuts per minute
- Single-phase, capacitor start/run motor with built-in overload protection against over-current and over-temperature damage
- Brass 7-vane, angled face, non-clogging and balanced designed impeller
- Case hardened to 60 HRc 440 stainless steel cutter system
 - Anti-roping design
 - Field replaceable
- Upper and lower ball bearings
- 140 °F (60 °C) liquid temperature rating
- GP-M grinder pumps require control panel or capacitor kit specifically matched to pump for proper operation and third-party approvals
- Compact and easier to lift only 75 lbs (34 kg)

PERFORMANCE DATA

CONSTRUCTION

Motor Cover	Cast iron with epoxy coating
Motor Cover O-Ring	Nitrile
Motor Design	Single-phase, capacitor start, capacitor run
Insulation Class	F
Overload Protection	Internal, on winding thermal protector
Motor Shaft	AISI 300 series stainless steel
Ball Bearing-Upper	Single row ball, 6203
Ball Bearing-Lower	Single row ball, 6306
Seal Housing	Cast iron with epoxy coating
Mechanical Seal	Carbon/ceramic
Volute	Cast iron with epoxy coating
Impeller	Brass
Rotating Cutter	2 blade design, AISI 440C stainless steel, through-hardened to Rockwell 55-60C
Stationary Cutter	AISI 440C stainless steel, hardened to Rockwell 55-60C
External Hardware	300 series stainless steel
Power Cable	Type SOW or SOW 14/3 AWG

GRINDER PUMPS

SIMPLEX GRINDER PACKAGES

APPLICATIONS

- Low pressure sewer applications
- Sewage wastewater transfer for light commercial or residential applications

FEATURES

PACKAGE SYSTEMS

- Pre-assembled with stainless steel rail system with sealing flange, discharge pipe disconnect, three pre-set control float switches, stainless steel lifting chain, junction box, ball check valve, and shut-off valve
- Includes GP series 2 hp grinder pump (installed in field), grinder control panel/alarm with starting component matched to grinder motor
- Cover structural foam

GRINDER PUMPS

DUPLEX GRINDER PACKAGES

APPLICATIONS

- Low pressure sewer applications
- Sewage wastewater transfer for light commercial or residential applications

FEATURES

PACKAGE SYSTEMS

- Two cast iron ball check valves
- Control panel with integral pump starting components
- Four control float switches
- Stainless steel float bracket
- Junction box
- Basins are heavy-duty fiberglass material. Duplex basins are 36" diameter, and are available in 48", 60", 72", 84", 96", 108", and 120" depths
- 4" Adapt-A-Flex inlet hub
- Solid fiberglass cover, stainless steel rail system with sealing flange, discharge pipe disconnect, stainless steel lifting chain, ball check valve, and shut-off valve
- Easy-to-follow installation instructions

GRINDER PUMPS

SIMPLEX HARD PIPED PACKAGES

APPLICATIONS

- Low pressure sewer applications
- Sewage wastewater transfer for light commercial or residential applications

FEATURES

- Fiberglass basin comes configured with hard pipe installation
- 1-1/4" SCH 80 PVC check valve and ball valve
- SCH 80 PVC discharge piping with union disconnect
- 4" Adapt-A-Flex inlet hub
- Cover is ribbed structural foam and green in color to blend with terrain
- 1-1/4" FNPT discharge flange factory installed
- 2 hp GP Series automatic grinder pump eliminates the need for a control panel

SERIES SPECIFICATIONS

Simplex Grinder Hard Piped Package System**

Item No.	Model	Basin		
		Size	Style	Description
520824	GP-SMPXFG-HP	24" x 48" 61 cm x 122 cm	Fiberglass	BS2448FGHP

GRINDER PUMPS

DUPLEX HARD PIPED PACKAGES

APPLICATIONS

- Low pressure sewer applications
- Sewage wastewater transfer for light commercial or residential applications

FEATURES

- Solid fiberglass cover with non-skid surface and green in color to blend with terrain
- Basin comes configured with hard pipe installation
- 4" Adapt-A-Flex inlet hub
- 1-1/4" FNPT discharge flange factory installed
- Control panel with integral pump starting components
- Four weighted control floats
- 2 hp GP Series sewage grinder pumps

PUMP PERFORMANCE DATA

GRINDER PUMPS

GRINDER RETROFIT KIT

APPLICATIONS

- Low pressure sewage
- Direct simplex replacement grinder for positive displacement grinder systems

FEATURES

- Patented cutting system providing tight cutting clearances for superior cutting action grinding 414,000 cuts per minute
- Rigid construction for ease of handling
- Fast, simple, and easy installation
- Epoxy-coated steel cover
- Water-tight junction box for ease of installation
- 2 hp 3450 rpm, high starting torque, automatic grinder pump with mechanical float switch
- Higher head capability to cover more applications
- 1-1/4" cast iron anti-siphon/check valve
- 1-1/4" NPT piping
- Telescoping discharge (520835 only)
- Adjustable alarm float switch preset at factory
- Quick disconnect plug

PERFORMANCE DATA

CONSTRUCTION

Motor Cover	Cast iron with epoxy coating
Motor Cover O-Ring	Nitrile
Motor Design	Single-phase, capacitor start, capacitor run
Insulation Class	F
Overload Protection	Internal, on winding thermal protector
Motor Shaft	AISI 300 series stainless steel
Ball Bearing-Upper	Single row ball, 6203
Ball Bearing-Lower	Single row ball, 6306
Seal Housing	Cast iron with epoxy coating
Mechanical Seal	Carbon/ceramic
Volute	Cast iron with epoxy coating
Impeller	Brass
Rotating Cutter	Multi-blade design, AISI 440C stainless steel, through-hardened to Rockwell 55-60C
Stationary Cutter	AISI 440C stainless steel, hardened to Rockwell 55-60C
Power Cable	Type SOOW or SOW 14/3 AWG

Spec Sheet 996382 and 996153

PIGGYBACK MECHANICAL FLOAT SWITCH

APPLICATIONS

- Residential sewage waste transfer

FEATURES

- RFSN-6, RFSN-9, and RFSN-10 convert any manual pump, up through 1/2 hp (115 V) or 1 hp (230 V)
- RFSN-16 and RFSN-20 convert any manual pump, up through 3/4 hp (115 V), or 2 hp (230 V)
- UL and CSA listing

Item No.	Model	Volts	Max. Amps	Cord
599118	RFSN-6	115/230	13	10' 3 m
599117	RFSN-9	115/230	13	15' 4.6 m
599128	RFSN-9	208/230	13	15' 4.6 m
599210	RFSN-10	115/230	13	20' 6 m
599119	RFSN-10	115/230	13	20' 6 m
599211	RFSN-16	115/230	15	20' 6 m
599318	RFSN-20	125/230	20	20' 3 m (w/o plug)

PIGGYBACK MECHANICAL VERTICAL FLOAT SWITCH

APPLICATIONS

- Residential sewage waste transfer

FEATURES

- Converts any manual pump, up through 1/2 hp (115 V) or 1 hp (230 V)
- Adjustable pumping range from 6.5" (16.5 cm) to .75" (1.9 cm)
- Designed for use in confined areas
- Not sensitive to turbulence
- UL/CSA listing

Item No.	Model	Volts	Max. Amps	Cord
599261	RVMS-10	115/230	13	10' 3 m
599262	RVMS-15	115/230	13	15' 4.6 m
599263	RVMS-20	115/230	13	20' 6 m

PIGGYBACK DIAPHRAGM SWITCH

APPLICATIONS

- Converts manual pumps to automatic operation

FEATURES

- RS-5 converts any manual pump, up through 1/2 hp (115 V)
- RS-5-LL (low level) converts any manual pump, up through 1/3 hp (115 V)
- UL and CSA listing (115 V models only)

Item No.	Model	Volts	Max. Amps	Cord	Mounted to 5-MSP pump	
					On Level	Off Level
599008	RS-5	115	10	10' 3 m	6" - 9" 15.2 cm - 23 cm	1" - 4" 2.5 cm - 10.2 cm
599009	RS-5	115	10	18' 5.5 m		
599010	RS-5	230	10	8' 2.4 m (w/o plug)		
599014	RS-5LL	115	10	18' 5.5 m	2" - 3" 5 cm - 7.6 cm	1/2" - 1-1/2" 1.27 cm - 3.8 cm
599019	RS-5LL	115	10	25' 7.6 m		

DOUBLE-FLOAT PIGGYBACK MECHANICAL FLOAT SWITCH

APPLICATIONS

- Pump control

FEATURES

- Controls pumps up to 1 hp (120 V) and 2 hp (230 V)
- Adjustable pumping range of 1.75" (4.4 cm) to 48" (122 cm)
- Consists of two floats, one of which contains a holding relay, enabling the floats to function in series
-  and CSA listing

Item No.	Model	Volts	Max. Amps
14940410	15DFMMD1WP	115	13
14940411	15DFMMD2WOP	230 (w/o plug)	13

VERTICAL DIAPHRAGM SWITCH

APPLICATIONS

- For automatic control of a pump in water and sewage effluent applications

FEATURES

- Designed to operate in applications with limited space, such as small sump chambers
- These models feature either a 6" (15.2 cm) or 10" (25.4 cm) pumping range, max 1/2 hp, 13 amps
- UL and CSA listing

Item No.	Model	Volts	Cord	Pumping Range
599188	EDS-6-1-10	115	10' 3 m	6" 15.2 mm
599190	EDS10-1-10	115	10' 3 m	10" 25.4 mm
599166	VDS1506	115	15' 4.6 m	6" 15.2 mm
599169	VDS1510	115	15' 4.6 m	10" 25.4 mm
599167	VDS2010	115	20' 6 m	10" 25.4 mm

SUMP PUMP SWITCH REPAIR KIT

APPLICATIONS

- Switch repair kit

FEATURES

- Includes pressure switch bracket assembly, screw, diaphragm, and O-ring

Item No.	Model	Volts	Housing
599300	SPRK-1	6-CIA, 8-CIA, and 8-CBA	√
599310	SPRK-1-ML	6-CIA-ML (used in WRSC-6)	√
599320	SPRK-2	5-ASP, 6-CIA, 8-CIA, and 8-CBA	—
599314	SPRK-2-ML	6-CIA-ML (used in WRSC-6)	—
599350	SPRK-3	10-CIA and 12-CBA	—

SUMP PUMP DISCHARGE KITS

APPLICATIONS

- Discharging water out of the basement sump

FEATURES

- Kit works with all types of sump pumps
- Kit includes 1-1/4" x 24' (31.7 mm x 7.3 m) corrugated polyethylene hose, ABS threaded 1-1/2" MNPT (38 mm) x 1-1/4" (31.7 mm) barbed adapter and 1-1/4" MNPT (31.7 mm) x 1-1/4" (31.7 mm) barbed adapter and galvanized steel clamp

Item No.	Model	NPT
599303	SPDK	1-1/4" 31.7 mm
		1-1/2" 38 mm

HWAB ALARM

APPLICATIONS

- Indoor high water alarm

FEATURES

- NEMA 1 thermoplastic enclosure
- Mechanical float switch with 15' (4.6 m) cable
- Alarm has red LED warning light, horn with silence switch, and test button
- 9 VDC battery backup
- UL and CSA listing

Item No.	Model	Volts	Cord
513288	HWAB	115	6' 1.83 m

303HWXT ALARM

APPLICATIONS

- Indoor/outdoor high water alarm

FEATURES

- Type 3R watertight thermoplastic enclosure
- Mechanical float switch with 15' (4.6 m) cable
- Alarm has red warning light, horn with silence switch, and test button
- Includes pre-mounted terminal block so enclosure can also be used as a junction box
- UL and CSA listing

Item No.	Model	Volts
513273	303HWXT	115

INDOOR DUPLEX PUMP CONTROL ALTERNATOR AND ALARM SYSTEM

APPLICATIONS

- Switch repair kit

FEATURES

- Easy-to-install, NEMA 1, 3/4 hp device
- Low-cost alternative to conventional duplex control panels
- Operates two manual sump, sewage or effluent pumps
- Alternates to standby pump if energized pump fails to turn on
- Audible alarm and red light indicator
- Operates single-phase pumps with 15 max. run amps
- cULus listing

Item No.	Model	Volts	Max. Amps	Cord
513289	IDC-115	115	15	9.5' 2.9 m

LOW VOLTAGE WATER ALARM

APPLICATIONS

- Remote water sensor and alarm
- Warns of leaks and overflows in bath, kitchen, laundry, attic, basement, or anywhere there is a potential for leaks to occur

FEATURES

- Remote sensor detects water and sounds alarm
- 85 decibel alarm sounds for three days
- Sensor and alarm can be placed up to 6 ft apart
- Sensor has both suction cup and adhesive to secure in place
- Includes wall mounting hardware
- Space saving design
- Circuit test/reset button ensures system is working
- Low battery signal when battery needs replaced
- Requires one 9 V battery (not included)

Item No.	Model	Volts
513273	HW-9	9V/DC

CONTROLS (SIMPLEX SYSTEMS)

APPLICATIONS

- Indoor/outdoor simplex alarm system and pump control

FEATURES

- Includes control panel with audible alarm, silence switch, and red alarm beacon
- Three floats, one each for high water, pump on and off
- Floats have 20' (6 m) power cords
- HOA switch offers either hand, off or automatic operations
- Two floats - pump on/off and alarm, 513257 only
- UL and C-UL listing

Single-Phase

Item No.	Model	Volts	Hz	Amps
513267	1121W120H17A	120/208/230	60	15-20
513257	1151W200H17A	115/230	60	0-15

Three-Phase

Item No.	Model	Volts	Hz	Amps
513265	3121W611H	208/240	60	13-18
513282	3121W201H17A	208/240/480	60	2.5-4
513284	3121W401H17A	208/240/480	60	6-10
513286	3121W511H17A	208/240/480	60	9-14

CONTROLS (DUPLEX SYSTEMS)

APPLICATIONS

- Indoor/outdoor duplex alarm system and pump control

FEATURES

- Includes duplex pump control and alarm devices
- Pump alternator
- Visual and audible alarm and light system with silence
- Three floats, one each for high water, pump on and pump off (513258 only)
- Floats have 20' (6 m) power cords
- HOA switch offers either hand, off or automatic operations
- UL and C-UL listing

Single-Phase

Item No.	Model	Volts	Hz	Amps
513258	1221W120H6A17A	120/208/230	60	0-20
14940605	1221W120X6A	120/208/230	60	0-20

Three-Phase

Item No.	Model	Volts	Hz	Amps
513283	3221W201H17A	208/240/480	60	2.5-4
513285	3221W401H17A	208/240/480	60	6-10
513287	3221W511H17A	208/240/480	60	9-14
513266	3221W611H17A	208/240/480	60	13-18

JUNCTION BOXES

APPLICATIONS

- Provides a convenient location to connect all wiring required for a typical pumping station, on-site system, or other electrical installation

FEATURES

- NEMA 4X waterproof fiberglass thermoplastic enclosure

Item No.	Model
513281	JB66-3

LG PLUGGER

APPLICATIONS

- For wiring a pumping station installation

FEATURES

- Utilizes a receptacle to accept a 120 V or 230 V piggyback plug and a pump plug
- Liquid-tight seal and strain relief for the cable entering the junction box from the pumping station
- Terminal strip that can be used for connecting an alarm system to the junction box
- UL and CSA listing

Item No.	Model	Volts	Alarm	Float
513290	JPB120V	120	—	—
513292	JBP120V-TA1	120	101HW	Yes
513294	JBP120V-TAXT	120	303HWXT	Yes
513295	JBP230V-TAXT	230	303HWXT	Yes

PUMP DISCONNECT

APPLICATIONS

- When discharge is no lower than 18" (46 cm) below grade or where guide rails are not necessary

FEATURES

- Non guide rail disconnect
- Point of discharge should be above the liquid level

Item No.	Model	Disconnect
513302	PD-2	2" 51 mm

GUIDE RAIL SYSTEMS

APPLICATIONS

- For installations with a total depth of over 5' (1.5 m) when the discharge pipe is 18" (46 cm) or more below grade, particularly when the liquid level is above the discharge level*

FEATURES

- 3/4" (19 mm) IPS (iron pipe size) pipe rails should be used on the 1-1/4" (31.7 mm) and 2" (51 mm) system and 1-1/4" (31.7 mm) IPS pipe rail on the 3" (76 mm) system
- Brass foot guide supplied for use with steel pipe
- Guide rail brackets and steel stand-off brackets included with each system to support the upper end of the guide rail pipes
- One intermediate guide rail bracket is required for every 10' (3 m) of rail (guide rail pipes, lifting chain, and pull rod not included)

Item No.	Model	Discharge
513305	GR-3/4-114D	1-1/4" 31.7 mm
513301	GR-3/4	2" 51 mm
513300	GR-1-1/4	3" 76 mm

All guide rail products can be used with any of the Franklin Electric, Little Giant effluent and sewage pumps having a 1-1/4" (31.7 mm), 2" (51 mm), or 3" (76 mm) discharge.

*NOTE: Not for duplex installations. For guide rail information on duplex installations, please consult the factory.

INTERMEDIATE GUIDE RAIL BRACKETS

APPLICATIONS

- For use with guide rail systems

Item No.	Model	Guide Rail
513303	IGR-3/4	3/4" 19 mm (for use with GR-3/4)
513304	IGR-1-1/4	1-1/4" 31.75 mm (for use with GR-1-1/4)

SA-1 (SACRIFICIAL ANODE)

APPLICATIONS

- Magnesium accessory for use with aluminum-body pumps

FEATURES

- Provides corrosion protection
- Lead wire

Item No.	Model	Wire
599002	SA-1	8" 20 cm

CORD CONNECTORS

APPLICATIONS

- Provides strain relief

FEATURES

- Cord connector is liquid tight
- Polyamide neoprene gland resist salt water, weak acids/alkalis and other chemicals

Item No.	Model	Cord	Wire/Cable (AWG)
599207	CC-1	.270" to .480" 6.9 mm - 12.2 mm	18/2, 18/3, 18/4, 16/2 16/3, 16/4, 14/2, 14/3
599213	CC-3	.545" to .709" 13.8 mm - 18 mm	14/2, 14/3, 14/4, 12/2 12/3, 12/4, 10/2, 10/3

DISCHARGE ADAPTERS

APPLICATIONS

- Allows use of garden hose with utility and sump pumps

FEATURES

- Polypropylene, rust resistant

Item No.	Model	Size
599030	GH-1 Adapter (fits 5-MSP/ASP)	1" MNPT x 3/4" GHT 2.54 mm x 19 mm
599025	GH-3/4 Adapter	1-1/4" MNPT x 3/4" GHT 31.7 mm x 19 mm
599026	AD-6 Adapter (6-pk)	1-1/2" MNPT x 1-1/4" FNPT 38 mm x 31.7 mm

CAST IRON FULL FLOW CHECK VALVES

FEATURES

- Vertical or horizontal installation
- Full-flow design
- Stops back flow of water
- Rated at 50 psi (115' [35 m] head) at 130 °F (55 °C)
- Cast iron NPT

Item No.	Model	Volts
599132	CVCI-112NPT	1-1/2" 38 mm
599133	CVCI-2NPT	2" 51 mm
599134	CVCI-3NPT	3" 76 mm

CAST IRON SLIP X SLIP UNION CHECK VALVE

FEATURES

- Vertical or horizontal installation
- Allows passage of 1-1/2" (38 mm) solids
- Checks backflow of water and sewer gas
- 2" (51 mm) ABS, PVC, steel pipe or copper piping
- Rated at 4.3 psi (10' [3 m] head) at 130 °F (55 °C)
- Cast iron NPT

Item No.	Model
599135	CVCI-2

CV-112 CHECK VALVE

FEATURES

- Universal check valve for sump pumps
- 1-1/2" MNPT (38 mm) x 1-1/2" (38 mm) ID tubing

Item No.	Model	Material
577130	CV-112	PVC

CV-114/112 CHECK VALVE

FEATURES

- Sump pump check valve fits both 1-1/4" (31.7 mm) and 1-1/2" (38 mm) pipe
- Full-flow, slip x slip design passes 1" (25.4 mm) solids

Item No.	Model	Material
559059	CV-114/112	ABS

CV-SE CHECK VALVE

FEATURES

- Hose-connected check valve for 2" (51 mm) IPS pipe
- Allows passage of 3/4" (19 mm) solids

Item No.	Model	Material
940021	CV-SE	ABS

CV-SE1 CHECK VALVE

FEATURES

- Uses compression gaskets to connect to 1-1/2" (38 mm) IPS pipe
- Full-flow design passes 1-1/2" (38 mm) solids

Item No.	Model	Material
940019	CV-SE1	PVC

CV-SE2 CHECK VALVE

FEATURES

- Uses compression gaskets to connect to 2" (51 mm) IPS pipe
- Full-flow design passes 2" (51 mm) solids

Item No.	Model	Material
940022	CV-SE2	PVC

CV-SE3 CHECK VALVE

FEATURES

- Uses compression gaskets to connect to 3" (76 mm) IPS pipe
- Full-flow design passes 3" (76 mm) solids

Item No.	Model	Material
940023	CV-SE3	PVC

CVBV-2 CHECK VALVE

FEATURES

- PVC check valve/ball valve combination uses compression gaskets to connect to 2" (51 mm) IPS pipe
- Full-flow design passes 2" (51 mm) solids

Item No.	Model	Material
940021	CV-SE	ABS

CVBV-2U CHECK VALVE

FEATURES

- PVC check valve/ball valve combination uses union fittings to connect 2" (51 mm) IPS pipe
- Full-flow design passes 2" (51 mm) solids
- Pressure rating: 100 psi @ 72BF

Item No.	Model	Material
940019	CV-SE1	PVC

GP GRINDER SERIES (CONTROL PANEL AND ALARM)

APPLICATIONS

- Designed exclusively for the GP Manual Grinder Series

FEATURES

- Properly sized start components maximize efficiency and service life of the GP grinders
- Color-coded terminal strip for ease of installation
- Circuit breaker, audible alarm, silence switch, and red flashing light are enclosed in a NEMA 4X waterproof enclosure
- Three floats (sold separately) control on, off, and alarm functions
- UL and CSA listing

Simplex

Item No.	Model	Volts	Floats
513374	MGP-1C18-2	208/230	3 floats required

Duplex

Item No.	Model	Volts	Floats
513375	MGPD-1C18	208/230	4 floats required

The GP Grinder Series requires a specific controller panel or capacitor kit from Franklin Electric specifically matched to the Little Giant pump for proper operation and third-party approvals.

JUNCTION BOX ALARM KIT

APPLICATIONS

- Designed specifically for auto grinder installations

FEATURES

- Circuit breaker
- Labeled terminal block
- Alarm block
- Alarm float

Item No.	Model
513297	JBAK

CONTROL FLOATS

APPLICATIONS

- For use with control panel and alarms

FEATURES

- Mechanically activated contacts
- Not sensitive to rotation
- 5 amp, 115/230 VAC, 50/60 Hz

Item No.	Model	Switch	Cord
950266	CFSW	Weighted control float switch	20' 6 m
950267	CFST	Control float switch with cable clamp	20' 6 m

GRINDER LEG KIT

APPLICATIONS

- Grinders

FEATURES

- Includes three stainless steel support legs with stainless steel hardware
- A special stainless steel leg kit is available for "hard-piped" installations
- Easy to install, the legs raise the pump inlet area to approximately 4" (102 mm) off the surface to ensure clearance for solids to enter

Item No.	Model	Use
599078	GLK	For GP series only

CAPACITOR KIT

APPLICATIONS

- For GP series

FEATURES

- Includes start capacitor, run capacitor, relay, end caps, and mounting hardware

Item No.	Model	Volts
520857	GP-CK	208/230

Wastewater

Guidelines for Sizing

Features

- These guidelines cover the steps which need to be taken to accurately select the correct sewage pump and applicable systems to use in sewage ejectors.

Work through the five steps below to size the system:

- System capacity (gpm required)
- Total head
- Pump selection
 - Solids handling
- Basin size
- Simplex/Duplex system

Guidelines for Sizing

System Capacity

System Capacity refers to the rate of flow in gallons per minute (gpm) necessary to efficiently maintain the system. The "Fixture Unit" method is suggested for determining this figure. This approach assigns a relative value to each fixture or group of fixtures normally encountered. Determination of the required **System Capacity** is as follows:

- List all fixtures involved in the installation and using Figure 1, assign a Fixture Unit value to each. Add to obtain total.
- Referring to Figure 2, locate the total Fixture Unit amount along the horizontal axis of the graph and follow vertically until intersecting the plotted line. Read the **System Capacity** in gpm along the vertical axis.

Figure 1.

FIXTURE DESCRIPTION	UNIT VALUE	TOTAL USED
Bathroom group, consisting of lavatory, bathtub or shower and (direct flush) water closet	10	
Bathroom group, consisting of lavatory, bathtub or shower and (flush tank) water closet	6	
Bathtub with 1-1/2" trap	2	
Bathtub with 2" trap	3	
Bidet with 1-1/2" trap	3	
Dental unit or cuspidor	1	
Drinking fountain	1	
Dishwasher (domestic type)	2	
Kitchen sink (domestic)	2	
Kitchen sink (domestic with waste grinder)	3	
Lavatory with 1-1/2" trap	1	
Lavatory (barber or beauty shop)	2	
Laundry tray (2-compartment)	2	
Shower stall	2	
Shower (group), per head	3	
Sink (service type with floor drain)	3	
Sink (scullery)	4	
Sink (surgeons)	3	
Urinal (with flush valve)	8	
Urinal (with flush tank)	4	
Water closet (flush valve)	7	
Water closet (flush tank)	3	
Swimming pools (per 1000 gal. capacity)	1	
Unlisted fixture with 1-1/4" trap size	2	
Unlisted fixture with 1-1/2" trap size	3	
Unlisted fixture with 2" trap size	4	
Unlisted fixture with 2-1/2" trap size	5	
Unlisted fixture with 3" trap size	6	
Unlisted fixture with 4" trap size	7	
Water softener (domestic)	4	
Washing machine	2	
	TOTAL	

Figure 2.

Total Head

Total Head is a combination of two components — static head and friction head — and is expressed in feet (refer to Typical Installation illustration, Figure 3).

Static Head is the actual vertical distance measured from the minimum water level in the **Basin** to the highest point in the discharge piping.

Friction Head is the additional head created in the discharge system due to resistance to flow within its components. All straight pipe, fittings, valves, etc. have a friction factor which must be considered. These friction factors are converted to, and expressed as, equivalent feet of straight pipe, which can then be totaled and translated to friction head depending on the flow and pipe size. Basically, this is reduced to four steps.

- It will be necessary to determine the discharge pipe size. In order to ensure sufficient fluid velocity to carry solids, (generally accepted to be 2' per second), flows should be at least:
 - 9 gpm through 1-1/4" pipe
 - 13 gpm through 1-1/2" pipe
 - 21 gpm through 2" pipe
 - 30 gpm through 2-1/2" pipe
 - 46 gpm through 3" pipe
- The length of the discharge piping is measured from the discharge opening of the pump to the point of final discharge, following all contours and bends.
- To determine the equivalent length of discharge piping represented by the various fittings and valves, refer to Figure 5 and total all values. Add this to the measured length of discharge pipe and divide by 100 to determine the number of 100' increments.
- Refer to Figure 4 and find the required **Pump Capacity** (determined from Figure 2). Follow gallons per minute to pipe size being used. Multiply this number by the number of 100' increments.

Add the Static Head and Friction Head to determine **Total Head**.

Guidelines for Sizing

(C) TOTAL FRICTION FACTORS OF FITTINGS		
(D) TOTAL (B+C)		
(E) DIVIDED (D) BY 100		
(F) HEAD LOSS PER 100 FT. OF PIPE (from Figure 4)		
(G) FRICTION HEAD (ExF)		
(H) TOTAL HEAD (A+G)		

Pump Selection

Every centrifugal pump has a unique performance curve. This curve illustrates the relationship of flow (**gpm**) to pressure (**Total Head**) at any point. The pump will operate at any point along this performance curve.

Pump capacity is therefore the flow the pump will generate at any specific pressure. The object is to select a pump whose performance curve passes either through or close to the design condition, preferably above. Refer to Figure 7.

Solids Handling

Solids Handling requirements may be determined by local codes and/or by the type of application and types of solids anticipated. Unless otherwise stated by codes, a sewage pump should have the capability of handling spherical solids of at least 2" in diameter in installations involving a water closet.

Basin Size

Basin selection is best accomplished by relating to required **System Capacity** as determined by the **Fixture Unit** method.

Figure 6 shows recommended basin diameters, assuming the normal pump differential (distance in inches between turn-on and turn-off), and running time ranges from 15 seconds to 4 minutes. **Basin** depth, however, should be at least 24" below basin inlet for most pumps and deeper where greater pumping differentials are anticipated.

NOTE: Since basin size is directly related to frequency of pump operation, it is important to select a basin of sufficient size to ensure that the pump does not short cycle.

The question of whether to use a **Simplex** or **Duplex** system depends on the type of installation and/or local codes. Generally, a determination can be made using the following guidelines.

1. Domestic: **Simplex System** is usually adequate.
2. Commercial: **Optional** — Depending on the type of business and the need for uninterrupted sanitary drainage facilities.
3. Public or Industrial: **Duplex System** is essential.

While you are sizing the system and before you select the pump, you will need to know and consider or make allowances for the following:

- Volts/Phase/Hertz — What is available?
- Will the pump share a circuit?
- Does the home, business, etc. have circuit breakers or fuses?
- What is the breaker or fuse Amp rating? Make sure it is enough.
- Check local or state codes for:
 - Solid size requirements
 - Amp ratings/circuit cord size/ratings or type
 - Pipe material/size/depth to bury
 - Tank size/location
- Are there plans for future expansion? As in, adding upstairs bath, basement plumbing, washing machine, etc.

Guidelines for Sizing

Figure 6.

BASIN SIZING

		BASIN DIAMETER (inches)					
		18"	24"	30"	36"	42"	48"
SYSTEM CAPACITY (GPM)	20						
	25						
	30						
	35						
	40						
	45						
	50						
	60						
	70						
	80						
	90						
	100						
	125						
	150						
	175						
	200						
	225						
GALLONS/FOOT OF BASIN DEPTH		13.2	23.9	36.7	52.9	72.0	94.0
GALLONS IN 2-1/2' OF BASIN DEPTH		33.0	59.7	91.7	132.2	180.0	235.0

Select minimum basin depth so that 2-1/2' of basin depth in gallons = Pump capacity in **gpm**
 = Acceptable basin size

Guidelines for Sizing

Example Sizing Problem

What **Pump Capacity** would be required to handle the drainage from a 4 bathroom home, also including a dishwasher, a washer, a laundry tray, a kitchen sink, water softener, basement shower, a 13,000 gallon pool, and a bar sink (1-1/2" trap)?

1. From Figure 1:

DESCRIPTION	FIXTURE UNITS
Four bathroom groups	24
Water softener	4
Dishwasher	2
Washing machine	2
Laundry tray	2
Kitchen sink with disposal	3
Basement shower	2
Swimming pool	13
Bar sink (unlisted 1-1/2")	3
FIXTURE UNITS TOTAL	55

2. Refer to Figure 2:

Find 55 fixture units on the horizontal axis. Follow vertically until intersecting the line then horizontally to the left. The **Pump Capacity** on the vertical axis is 30 gpm.

Determine the **Total Head** of the installation illustrated in Figure 3, the Typical Installation Illustration:

1. That Static Head in this instance is 7'.

2. Friction Head:

a. Since the required **Pump Capacity** in this illustration of 30 gpm is less than the 46 gpm necessary to carry solids through 3" pipe, 2" or 2-1/2" pipe should be used. If 3" pipe is preferred or required, a **Pump Capacity** of at least 46 gpm is required.

b. Measurement of the length of the discharge pipe totals 200'.

c. Refer to Figure 6 and note the friction factor in equivalent feet for each fitting:

3 - 90° elbows, 2" 16 - equivalent feet

1 - gate valve, 2" 1 - equivalent foot

1 - swing check valve, 2" 17 - equivalent feet

Total: 34 - equivalent feet

Adding 34' to the measured pipe length, the total effective pipe length becomes 234' or 2.34 100' increments.

d. Refer to Figure 4, find the 30 gpm required **Pump Capacity** on the left scale and follow over to the 2" PVC pipe size column. Friction Head is $1.8 \times 2.34 = 4.2'$.

3. Total Head Required:

Total Head = Static Head + Friction Head

Example:

Total Head = 7 + 4.2

Total Head = 11.2

Due to the existence of water closets in this installation, a pump with 2" **Solids Handling** capacity should be used unless otherwise specifically stated by applicable codes. Use Figure 7 to select pump.

To determine the **Basin** size, find the **Pump Capacity** (30 gpm) in the column on the left of Figure 6. Any **Basin** diameter of 18" or greater is acceptable.

Since this application is domestic, a **Simplex System** is sufficient.

Summary: Recommended selections for this installation would be a **Simplex System** utilizing an 18" or greater diameter **Basin** and a 2" **Solids Handling** pump capable of delivering at least 30 gpm at 11'.
