TRUE SET[™]

ADJUSTABLE DRAIN

***Easy leveling drain
for a “True Set”
every time!***

Scan this code with your smartphone
to watch our True Set demonstration.

You know the drill!

You've been there before! Hours spent making a drain install perfect, only to have your hard work knocked out of plumb when the cement goes in.

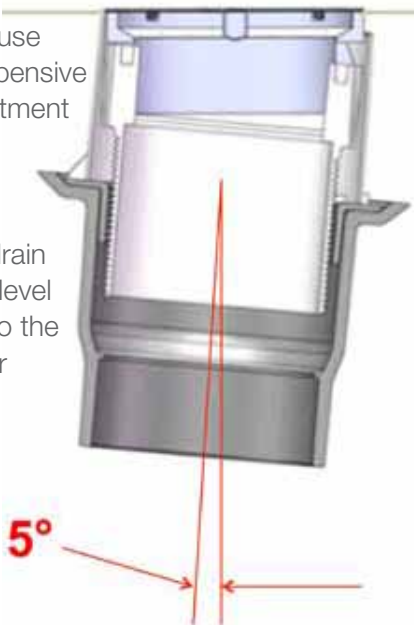

You can box out the drains, but that's a lot of extra time and money. Or you can reset the drains by chipping out the concrete, but who has time for that?

Well, we have the answer – the Oatey® True Set™ adjustable drain!

Our True Set adjustable drain uses an easy-leveling strainer mount to correct tilted drains! This unique, patent pending design quickly solves the problem!

No hard-to-use shims or expensive screw adjustment designs. The Oatey True Set adjustable drain gives you a level installation to the finished floor every time!

Let's take a closer look at everything the True Set drain does better.

Oatey True Set is going to reset the light commercial drain market. No other product offers the same set of benefits, nor the ease of use. Don't settle for less. Oatey True Set takes the worry and the rework out of commercial drains.

Just set it, and forget it!

No Spare Parts to Lose

Our drain assembly comes ready to install straight out of the carton with a strainer or cleanout cover protected under a concrete tight, impact resistant cover. No extra parts to keep on the truck.

1. After the concrete pour, locate the drain using the bright Oatey cap label.

2. Remove the cap label and the concrete tight cap.

3. Adjust the strainer to the finished floor surface.

Make it a True Set!

Strainer Mount Leveling Kit

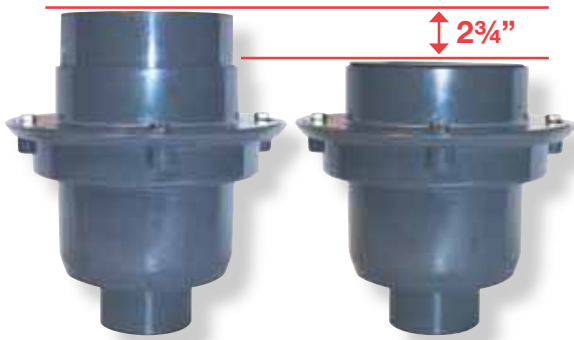

(Sold Separately)

Fix tilted drains up to 5 degrees! Just solvent weld the strainer mount to the drain barrier and you're done. Fix any tilted drain in minutes.

Proven to handle loads up to 10,000 pounds!

Solvent Cement sold separately.

Post-Pour Height Adjustment

Oatey True Set offers the highest post-pour height adjustment range, all the way up to 2-3/4". Or adjust it down when correcting a tilted drain.

No matter what the finished floor, True Set provides a perfect finish.

Smallest Drain Base on the Market

In the drain world, smaller is better. And True Set is the smallest drain base in the market – 8" diameter and 5" tall, accommodating 2", 3" and 4" pipe.

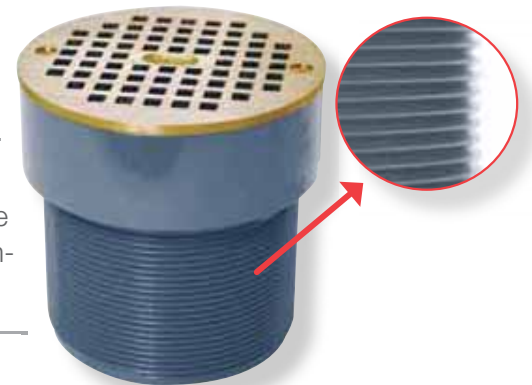

Concrete Tight Cap

Impact resistant cover is concrete tight, protecting strainer and cleanout.

Doubt the Grout

Finer threads on the True Set drain make for a tighter fit, reducing the likelihood of grout cracking and call backs. The concrete tight assembly protects the threads allowing for a precise post pour adjustment.

Interchangeable Drain and Cleanout

Easily convert a drain to a cleanout or vice versa..... even after the concrete is poured.

Look for the Label

Label on cap makes finding the drain easier after the concrete pour.

CUPC Listed

All 2" drains listed CUPC, all cleanouts listed UPC.

Only from Oatey – the choice of plumbing professionals.
