

The new degree of comfort.™

Air Handlers
RHPL Series

COMFORTABLY

QUIET AND EFFICIENT

Designed with maximum energy efficiency and quiet operation, the **Rheem High-Efficiency RHPL Air Handler** gives you a higher level of comfort while keeping your utility bills low.

Now that feels comfy.

RHPL Series

Advanced Comfort

Designed with the *Comfort Control® System*, the Rheem High-Efficiency Air Handler is performance-measured across 13 active monitoring points that can constantly maintain your home's comfort level while delivering maximum energy efficiency.

Reduce Energy Bills

Reducing monthly energy bills is easier than ever with the Rheem High-Efficiency Air Handler. The unit is designed to exceed minimum efficiency standards, which is good news for your monthly utility bill.

Guaranteed Reliability

Built with pride, our quality construction delivers quiet operation and long-lasting, reliable performance, all backed by a 10-year limited parts warranty.

INTEGRATED HOME COMFORT

Rheem.com

The Comfort Control² System

13
ACTIVE
MONITORING
POINTS

When paired with a compatible outdoor component and thermostat, this advanced technology makes it easy to maximize your family's comfort and utility cost savings. The *Comfort Control² System* ensures that the Rheem High-Efficiency Air Handler runs at top efficiency by actively monitoring equipment — measuring temperature and relative humidity while providing detailed diagnostics for ease of repair and maintenance, including routine reminders for air filter changes.

Enjoy the Advantage of Cutting-Edge Technology

Featuring the *Comfort Control² System*, Rheem High-Efficiency Air Handlers are expertly designed to maximize energy efficiency and minimize energy costs while delivering reliable, quiet operation that makes being home even more comfortable.

Energy Savings The Rheem RHPL Series Air Handler is designed for high performance, exceeding the standard efficiency requirements and, in many cases, enhancing the efficiency rating of your outdoor air conditioning unit.

Humidity Control A new Rheem Air Handler will help manage humidity levels in the home, improving your comfort and helping you save money on energy bills.

Efficient Heating & Cooling Rheem Air Handlers also feature a flexible design that allows them to meet the needs of a variety of systems. Your contractor will recommend a unit that will best meet your home's airflow needs. The factory-installed indoor cooling coil is the key component for your air handler. The coil is essential to humidity control and improved system performance, and the high-quality standards used in manufacturing result in fewer maintenance calls.

The Rewards of Rheem Proven Quality

Quiet Operation The Rheem RHPL Series Air Handler is designed with a sturdy steel cabinet with one inch of foil-faced insulation, offering excellent thermal and sound insulation.

Optional Electric Heat When a heat pump is paired with the unit, Rheem Air Handlers can also provide efficient heating for your home. An optional electric heater kit can be added to keep you cozy all winter long.

Easy Service Rheem Air Handlers have been engineered to provide your technician easy access to all internal components, helping any service time stay short and simple.

Benefits At-A-Glance
